

7 Ways to Empower **Identity Security** Across Organizations

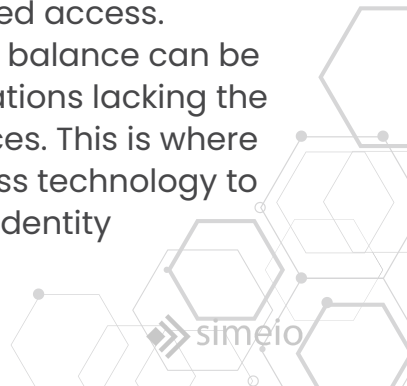

Set Sail with SailPoint & Simeio

In today's rapidly evolving digital landscape, organizations face the challenge of managing and securing thousands of identities and access rights across their enterprise. With the increasing complexity of IT environments and the growing sophistication of cyber threats, maintaining robust identity governance has become vital. Simeio and SailPoint want to solve this challenge for your enterprise.

Recognizing this need, [SailPoint](#), the leader in identity security, recently launched its Managed Service Provider (MSP) program, signaling a new era of simplified identity governance for organizations worldwide. Simeio is proud to be a partner. The goal is to empower organizations with comprehensive identity governance solutions while leveraging the expertise of a trusted managed service provider. But what exactly does this mean, and how does it benefit organizations striving for enhanced identity security and compliance?

1. Simplified Identity Governance

Identity governance is not just about managing user access; it's about ensuring the right individuals have the appropriate access to resources at the right time while also mitigating risks associated with unauthorized access. However, achieving this delicate balance can be daunting, especially for organizations lacking the necessary expertise and resources. This is where Simeio intersects with world-class technology to deliver services that streamline identity governance processes.

2. Rapid Application Onboarding with Simeio and SailPoint

Navigating the complex landscape of identity governance requires specialized knowledge and experience. By utilizing our managed services, organizations gain access to a pool of skilled professionals well-versed in deploying, configuring, and managing zSailPoint's industry-leading identity solutions. Simeio's rapid application onboarding ensures that new applications are quickly integrated into your identity governance framework, minimizing downtime and enhancing security posture.

3. Identity Orchestration Platform

Simeio's Identity Orchestration Platform is designed to automate and simplify identity management across diverse IT environments. Whether it's implementing access controls, enforcing compliance policies, or responding to security incidents, our platform offers invaluable expertise to help organizations fortify their security posture and mitigate risk.

4. Scalability and Flexibility through Simeio and SailPoint

As businesses evolve and expand, their identity governance needs to evolve as well. With this in mind, Simeio offers scalability and flexibility, allowing organizations to adapt their identity governance strategies to suit changing business requirements. Whether scaling infrastructure, implementing cloud modernization, or integrating new applications and systems into environments, our managed services solutions are equipped to seamlessly align identity governance practices with evolving business objectives.

5. Cost-Efficiency

Deploying and managing identity governance solutions in-house can be resource-intensive, requiring ongoing investments. Simeio's SailPoint Managed Services offers a cost-effective alternative, enabling organizations to leverage best-in-class identity technology solutions on a subscription basis. By outsourcing identity governance responsibilities to a trusted partner, organizations can optimize resource allocation, reduce operational overhead, and achieve greater ROI on their security investments.

Simeio's managed services leverage SailPoint's top IAM solutions, delivering cost-effective identity governance and improved security ROI.

6. Enhanced Security and Compliance

In today's regulatory landscape, compliance with data privacy regulations and industry standards is non-negotiable. Failure to comply can result in hefty fines, reputational damage, and loss of customer trust. Our professional team is equipped with the tools and knowledge needed to strengthen security postures and maintain compliance with regulatory mandates such as GDPR, CCPA, HIPAA, and more. From continuous monitoring and auditing to timely incident response, MSPs play a pivotal role in helping organizations mitigate risks and uphold regulatory requirements.

7. Making Access Happen Now with Simeio and SailPoint

Our SailPoint Managed Services team is there to navigate the complexities of identity governance with confidence and efficiency. By partnering with SailPoint and Simeio, organizations can unlock a wealth of benefits, including simplified identity governance, access to expertise, scalability, cost-efficiency, and enhanced security and compliance.
